On Premise – Hardware – Maintenance & Security Compliance

As a technology and managed IT service and supply company, our customers are provided with state-of-the-art equipment, as we continue to deploy advanced telecommunication equipment and services on their sites, this includes but is not limited to.

- 1 – Yealink IP Phones
- 2 – Grandstream IP Phones
- 2 – TP Link Routers
- 3 – Hikvision Security System.

As part of our ongoing efforts to comply with equipment & security maintenance, V4 Telecom levies a maintenance fee between £11.99 - £32.99 Excluding VAT on our contracts, dependent on the associated equipment and security systems provided by V4 for the account. This is provided free of cost for the first three months of the contract or unless specified otherwise and becomes chargeable thereafter. This notification serves the purpose to notify you in advance, that if your account is eligible to receive any one of the V4's cover and maintenance benefit, then the accorded maintenance fees as relevant to your account, would be levied from the 1st of August 2022.

As a V4 Telecom customer, it is not necessary that you see this maintenance cover by default, as this is dependent on the services associated with the account and eligibility of the contract signed, so if you do not see this maintenance cover on your account, please call our account management desk to discuss alternative options so you could avail such benefits.

Due to the large number of enquiries we have received wanting to avail this maintenance plan, we have decided to offer the first month FOC to select customers as part of our “customer first” initiatives.

A detailed copy of our maintenance benefits can be downloaded from our website via, <https://www.v4telecom.co.uk/terms-of-business> , or can be requested via e-mail to am@v4telecom.co.uk and your account manager would be more than happy to walk you through the same. A snippet of the cover and its benefits is embedded below.
